3A/FDA/CE
APPROVED

FULLY AUTOMATIC ROTARY FILLING & SEALING MACHINE

MOD. NB 070

SPECIAL FEATURES

- Exceptional versatility enables the machine to fill a broad range of liquid and paste products.
- 7 or 9 station rotating platform according to cup configurations and capacity.
- All product contact parts are stainless steel. The machine is manufactured using stainless steel, anodized aluminum and plastic, all of which conform to EEC and FDA standards for food grade materials.
- Economically priced with high quality finished product.

OPTIONS:

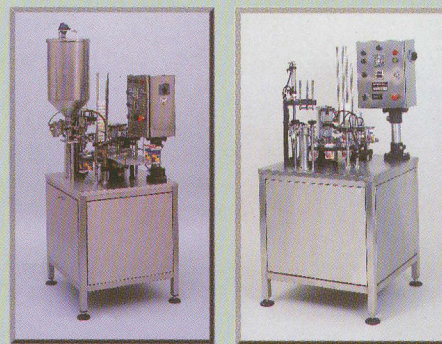

- Two filling operations can be performed in the same cup before sealing (e.g. yogurt topped with granola or pudding topped with whipped cream).
- Code printing.
- Discharge conveyor.

AUTOMATIC OPERATIONS INCLUDE:

- dispensing of cups into the pocket
- filling of the cup
- pre-cut aluminum foil lid placement on the cup
- heat sealing
- code printing on lid (optional)
- ejection of cups - clean and dry
